

GLOBAL 1,000 UPCOMING RAIL PROJECTS REPORT & DATABASE 2020-2035

Opportunities for Developers, Contractors and Suppliers

Global Mass Transit Research has just launched the **Global 1,000 Upcoming Rail Projects Report & Database 2020-2035**, which tracks **1,000 new and upcoming rail projects in 100 countries across the world.**

These 1,000 projects will involve the development of **around 44,000 km** of network at an investment of around **USD1,800 billion** and present significant opportunities for contractors, developers, financiers, rolling stock providers, fare system technology providers and signalling system providers.

The report includes 2 sections:

- A **PPT** (converted to PDF document) providing an analysis of the opportunities in terms of geographic region, development stage (planned, in procurement, or under construction), mode (light rail, tram, monorail, automated people mover, metrorail, subway, rapid transit, airport rail link, commuter rail, passenger rail), and type of project (new line of an existing system, extension of existing line, or new system).
- An **MS Excel database** organised into five regions: North America, Latin America, Asia, Europe, and Middle East and Africa. It provides detailed and up-to-date information on each project, with separate Excel workbooks for each of the five geographic regions.

Each project profile in the MS Excel database provides information on

- Developer/operator	- Sources of funds	- Planned fare system
- Network length	- Key contractors	- Planned rolling stock,
- Route	- Connections with other public transport modes	- Track and power
- Planned service frequency	- Expected ridership	- Planned signalling technology
- Expected opening	- No of stations	- Key contact person for the project
- Capital cost	- Project type	- Additional information

Key benefits to the buyers:

- Get the latest region-wise expected investment in rail projects by 2025, 2030 and 2035
- Focus on key high investment projects across regions
- Explore opportunities for construction, consulting, and supply of rolling stock, fare systems, signalling system, etc. available in the database as part of 1,000 upcoming rail projects
- Receive comprehensive analysis of projects by type (expansion, modernisation upcoming), status (feasibility stage, planning stage, tendering stage, under construction), and expected completion (2025, 2030 and 2035)
- Learn about planned investment and component requirements (fare system, rolling stock, signalling and communications technology)
- Get the market outlook for urban rail and station development and the forecast of expected demand for rolling stock, signalling and fare system

The annual subscription fee for the database is USD5,400. As a special offer for Public Transport Authorities/Agencies, the database is priced at USD4,900.
